Patrick Gilmore Joins Datastrip as Vice President of National Sales – MEA

Thame, UK (April 20, 2009) — Datastrip, a world-leading provider of field-proven mobile identification and verification technology, has announced the appointment of Patrick Gilmore as Vice President, National Sales – Middle East & Africa.

Patrick brings a wealth of sales experience and knowledge to an expanding successful sales team and will be responsible for identifying and pursuing new business opportunities, as well as building on the business relationships with existing partners.

“We are delighted to have someone of Patrick’s calibre joining Datastrip” said Steve Blackmore, Datastrip’s Chief Executive Officer. “In his new role Patrick will be instrumental in addressing the growing demand for mobile verification solutions to governments and organizations throughout the region.”

Prior to joining Datastrip, Patrick gained vast experience in the biometrics industry, first with Daon and since November 2005 with Motorola, responsible for sales in Africa and the Middle East. During his time at Motorola, Patrick successfully concluded business on both continents in a number of high profile projects involving biometric identification solutions.

About Datastrip

Datastrip is a leading provider of biometric verification devices in today’s mobile arena, enabling fast, accurate identity verification across multiple markets and harsh environments. With its quality driven design and manufacturing process and installed base, Datastrip is the industry leader in providing rugged, ergonomic and feature rich mobile verification terminals. Datastrip’s diverse line of handheld readers provide the flexibility and customisation needed for specialised applications and interoperability into existing systems for ease of deployment into mainstream verticals such as law enforcement, government, military and commercial markets.
